- Over 30 finishes include Special aged cast Iron Rust, Copper Verde Antique, Italian Marble, Platinum Pewter, Washed Terracotta and Sandstone or Gloss Antique Bronze, Antique Patina and many others including standard plain colours.
- Aged finishes will continue to age naturally ongoing.
- Our poly-fibre resin planters are very light-weight and can be easily transported.
- The products have thick walls and do not break easily. If chipping does occur, it will not be obvious as the colour is right through.
- Most of the planters take standard size styler watering liners facilitating indoor use in the home or office.
- All our products can be used with or as water features, they will also not crack in very hot or cold conditions.
- Drainage holes are standard. Please state "no holes" and "water seal" when ordering products that will contain water.
- Due to lower thermal transfer of heat, our poly-fibre resin planters will remain warmer in winter and cooler in summer and with less water loss which leads to healthier plants.
- Botanica planters are generally acknowledged as the best quality in the industry.

Rust - aged

Sandstone - aged

Copper - aged

Marble - aged

Platinum - aged

Terracotta - washed

Antique Patina

Antique Bronze

Sandstone standard

Terracotta standard
